For additional protection, the DTVP is made of aluminum and is waterproof up to a depth of four feet.. Kingston announced Tuesday that its DataTraveler Vault -- Privacy Edition (DTVP) USB Flash drive is now compatible with Apple Mac operating systems (OSX 10.. The drive is protected from brute-force attacks by locking down after 10 unsuccessful login attempts after which a reformat is necessary to make the Flash drive operable again.

We are happy to add Mac support to this 100-percent secured drive so the Apple community can be assured they have an on-the-go storage solution that is the best on the market at safeguarding data.. ' The release claims that data onboard the DTVP is secured by hardware-based, on-the-fly, 256-bit Advanced Encryption Standard (AES).. [ Related: ]

4x -- 10 5x) Outlook for mac email enormous A press release quotes Nitin Malhotra, Kingston Country Manager, India, 'Our DataTraveler Vault -- Privacy Edition has been popular with enterprise and government customers who use Windows-based systems and are looking for a safe and secure way to transport portable data.
